CAREER PROFILE

I am a Full Stack Software Developer with experience delivering scalable, secure, and user-focused applications. I specialise in modern web technologies including React, TypeScript, Node.js, C#, .NET Core, SQL/NoSQL, and RESTful APIs, and have contributed to the development of SaaS platforms and built custom client solutions across diverse industries.

I have hands-on experience with Kubernetes, Azure DevOps, CI/CD pipelines, and containerised microservices. I also actively leverage AI tools such as GitHub Copilot, Cursor, CodeRabbit, and LLMs to streamline development, review code for quality and security, and rapidly prototype new features.

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY

Central Queensland University | 2019 – 2022

- Graduated with distinction, GPA 6.7, Major: Application Development & Cybersecurity
- Multiple Letters of Commendation for Academic Excellence
- Team Lead on Capstone Project (highest-graded in cohort)

TECHNICAL PROFICIENCIES

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, NoSQL, HTML, CSS

Frameworks & Libraries: ASP.NET Core, Node.js, React, Next.js, Vue.js, Bootstrap, MUI, Tailwind

Cloud & DevOps: Docker, Kubernetes, Terraform, YAML, Azure DevOps, CI/CD Pipelines

AI Technology: Prompt Engineering, LLMs (OpenAI/Anthropic/Ollama), LangChain, RAG Systems, Vector Databases (Qdrant/Pinecone), Embedders, Semantic Chunking, Metadata Extraction

Databases: RDBMS, SQL Server, NoSQL, MongoDB, Entity Framework, LINQ, GraphQL

Testing: Unit Testing, Integration Testing, AAA Pattern, Jest, RTL, xUnit, NUnit, Moq

Authentication / Authorisation: Identity, OpenID, OAuth, Auth0, NextAuth, JWT, Cryptography

Key Tools: Visual Studio, VS Code, SSMS, Postman (RESTful APIs), Git, Azure Repos, MuleSoft, Docker, K8s, Atlassian (Jira, Confluence, Bitbucket), ServiceNow, Agile, SDLC, Figma, XD, CLI, Linux, Windows

WORK EXPERIENCE

FULL STACK WEB DEVELOPER

Campbell Digital | Feb 2025 – Present

Contracted by a Brisbane-based digital studio to deliver responsive, maintainable websites for various business clients.

- Develop end-to-end web solutions, including content updates, QA, and layout refinement.
- Build front-end interfaces and back-end features with PHP (WordPress Bedrock/Sage), Node.js/Express, SQL/NoSQL, React (TypeScript, JavaScript), Bootstrap, Tailwind, and SASS.
- Manage design, development, and deployment using Docker, Webpack, GitHub, Trello, Figma, and Photoshop.

FULL STACK SOFTWARE DEVELOPER

Infoview Technologies | Feb 2023 – Jan 2025

Contributed to enhancing and maintaining Infoview's Technology Expense Management SaaS platform, modernised legacy components, and developed new cloud-based microservices.

- Developed and maintained platform services using React, TypeScript, and ASP.NET Core.
- Built backend microservices and RESTful APIs using ASP.NET, Kubernetes, and Docker.
- Collaborated on Agile sprints, conducted code reviews, and contributed to feature architecture.
- Designed and delivered custom client integrations, and resolved platform incidents.
- Key Technologies: C#, ASP.NET Core, Entity Framework, React, TypeScript, JavaScript, Node.js, RESTful APIs, MuleSoft, Hangfire, Microservices, SQL, Java, Kubernetes, CI/CD, Git, Jira, Agile.

JUNIOR SOFTWARE DEVELOPER

Ellume Health | Mar 2021 – Oct 2022

Gained commercial web and mobile app development experience in a fast-paced health-tech startup, contributing to UI implementation, debugging, and testing of Ellume's applications and digital services for COVID testing.

- Helped build and maintain the company website and internal web applications using React, Next.js, JavaScript, HTML, CSS, Bootstrap, and SQL.
- Supported mobile app development through UI implementation, testing, and QA.
- Assisted with debugging, product support, and release preparation.

FREELANCE WEB & DIGITAL DEVELOPER

Various Clients, Self-Employed | Jun 2015 – Mar 2021

Delivered digital solutions for local businesses, managing the development and maintenance lifecycle.

- Built websites and web apps using .NET MVC, React, JavaScript, SQL, and WordPress/Drupal.
- Designed and created packaging, logos, branding elements, and marketing campaigns with Adobe Photoshop, Premiere, After Effects, and Illustrator.
- Managed projects to meet business requirements while respecting technical constraints, budgets, and deadlines.
